Write-Up

Bradley possesses one of the most unusual repertoires in the class. Rather than relying on velocity, the Oregon right-hander attacks hitters with movement, deception, and exceptional pitch separation. The arsenal is built around a heavy sinker, a sweeping breaking ball, and a changeup that serves as the primary bat-missing offering. The profile consistently forces hitters to make uncomfortable swing decisions and supports a professional starter projection.

The SI serves as the foundation of the arsenal. Averaging 91.3 mph with nearly 20 inches of arm-side movement, the pitch consistently generates weak contact and ground balls when located at the bottom of the strike zone. While the sinker produced only modest swing-and-miss, that was never its intended purpose. Bradley relies on the pitch to create poor swing decisions early in counts and establish the lower portion of the zone before deploying his secondaries. The movement profile and results support an above-average professional projection. 45/50 pitch.

The SWP provides a distinctly different movement profile and acts as the primary breaking ball.

Thrown in the upper-70s with nearly 18 inches of sweep, the pitch generated a 36.7% whiff rate and consistently worked beneath barrels. Bradley demonstrated confidence throwing the pitch against both right-handed and left-handed hitters while using it as a chase offering in two-strike counts. The shape creates substantial separation from the sinker and gives him a reliable secondary weapon. 50/55 pitch.

The CH is the carrying pitch and the reason the profile stands out. Averaging 78.5 mph with over 21 inches of arm-side movement, the offering generated a 62.5% whiff rate, 30.8% swinging-strike rate, and 48.9% CSW. Bradley showed a willingness to throw the pitch in any count, against either handedness,

and repeatedly generated swings over the top of the baseball. The movement profile creates exceptional separation from both the sinker and sweeper, making the pitch the centerpiece of the arsenal and a legitimate professional out pitch. 65/65 pitch.
